

Trinity Center Airport GENERAL AVIATION PILOT SURVEY

Trinity County has initiated work (in December 2005) on an Airport Layout Plan and Report for Trinity Center Airport. To be undertaken over the next 12-month period, the study will identify specific airport facilities or improvements that will be needed to meet future aviation demands. To help with this work, Coffman Associates (the airport consultant conducting the study) is interested in identifying the existing aviation demand and aircraft mix using the airport. This questionnaire has been designed to assist in the collection of specific information which will aid in assessing the need for airport improvements.

We greatly appreciate your assistance in this matter. Please return the completed form as soon as possible.

1. Do you base an aircraft (or helicopter) at Trinity Center? Yes_____ No_____

If yes, do you rent hangar space? Yes_____ No_____

If no, where do you currently base? _____

Would you base at Trinity Center if additional facilities were available? _____

Please indicate the zip code of your business or residence. _____

2. What type of aircraft (or helicopter) do you currently operate?

Aircraft Make _____ Model _____ Year _____

Please note if you operate different types _____

Please note if you are contemplating any changes _____

3. Approximately how many operations per month do you average at Trinity Center Airport?

_____ Approximately what percentage stay within the local pattern? _____

4. Please note your reasons for electing to base at this airport.

_____ Convenience (closer to where I live or work)
_____ Availability of aircraft hangar facilities or tiedowns
_____ Condition of airfield/lighting/navaids
_____ Other (please list) _____

5. Please list any specific improvements that you feel are needed.

Please FAX the survey to (816) 524-2575 or mail to the following address:
